PROFESSIONAL SUMMARY

Software Developer experienced in building end-to-end web applications, RESTful APIs in Python (FastAPI) and Node.js, and responsive interfaces with React, Next.js and TypeScript. Five products in production, including a marketplace with multi-account payments through Stripe Connect, secure authentication (JWT/2FA) and more than 2,000 automated tests with Playwright, Vitest and pytest. Hands-on with Docker, Cloudflare and CI/CD pipelines.

PROFESSIONAL EXPERIENCE

PataPass & Web Product Ecosystem (seu.pet) 2024 – Present
Full Stack Engineer & Technical Founder

- Architected and shipped the PataPass marketplace (seu.pet), connecting pet owners to walkers with geolocation via OpenStreetMap and real-time route streaming.
- Built the FastAPI backend with WebSockets for walk tracking, sustaining more than 310,000 seconds of uptime without incidents.
- Implemented a payment gateway with receivable splits through Stripe Connect and Mercado Pago, reconciled by asynchronous webhooks.
- Built Arachne (arachne.seu.pet), an extraction platform with semantic search (RAG) and an MCP server exposing 9 search, scrape and transcription tools.
- Configured Cloudflare infrastructure with Zero Trust (mTLS/Access) protecting the admin panel, edge caching, Turnstile and CI/CD through GitHub Actions.
- Structured unit and E2E suites with Playwright, Vitest and pytest, accumulating more than 2,000 tests over authentication, payments and GPS.

Brazilian National Water Agency (ANA) 2025
Automation & Data Developer

- Built Python routines to consume government APIs and asynchronously transform large water datasets.
- Modeled and tuned PostgreSQL schemas with indexes and queries for high volume.
- Wrote scripting tools to automate JSON and XML file processing.

Global Hitss 2024 – 2025
Systems & Network Support Technician

- Sustained corporate environments, managed Microsoft Azure / Active Directory access and resolved technical incidents under SLA.
- Wrote utility scripts that sped up diagnosis of recurring connectivity failures.

EDUCATION

- B.S. in Systems Analysis and Development — IESB University Center
- M.S. in Data Science and Big Data Analytics — IESB University Center (in progress)

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3

Backend & APIs: Python (FastAPI), Node.js, RESTful APIs, PostgreSQL, JWT/2FA authentication, Stripe Connect

Quality & DevOps: Playwright (E2E), Vitest, pytest, Docker, CI/CD (GitHub Actions), Cloudflare (Pages, Tunnel, R2, D1)

Environment: Linux, Git, WebSockets, Observability
